PROFILE

I'm Ben; 19 years old and surprisingly competent. Throughout my life I have been driven by many little obsessions, the most recent of which being software engineering and computing. I have a strong understanding of data structures and algorithms from topical courses at the University of Victoria and additional hands-on experience from my constant side projects.

WORK + VOLUNTEER EXPERIENCE

FREELANCE WEB DEVELOPMENT

May 2020 - Aug 2020

- Designed, built, and deployed Mind-Body-Attunement Therapy™'s model webpage (mbatherapy.com)
